## MEDICAL EXAMINATION FORM

Swiss life insurance companies

PI	ease note		
	We ask <b>the physician</b> to go through these questions together with the applicant and fill in the answers himself / herself if possible.	GLN	
	Please use block letters and write legibly. Thank you.		
	Insurers are prohibited by law from requesting the results of antenatal or <b>presymptomatic genetic tests</b> (testing to see whether a person is predisposed to illness before symptoms appear) unless certain conditions are met. If the preconditions for the right to ask questions are met, the investigation shall be carried out by using a separate form. Therefore, such findings do not have to be specified in the present questionnaire. Results which are voluntarily submitted may not be used by the insurers. <b>Genetic examinations for diagnostic purposes</b> , i. e. to clarify symptoms of illness which have already occurred, are not affected by this legal provision and must be declared.
